

Scaling Science: Commercializing Innovation Through Mindset and Teamwork

Luigi MESCHINI

Drawing on his professional experience working with UK universities and research centres, Luigi will explore some of the main challenges he has encountered in technology transfer and in supporting research teams as they transition from academic projects to viable startups. He will focus on three critical areas: fostering an entrepreneurial mindset, building multidisciplinary teams that complement scientific expertise, and developing the commercial capabilities needed to validate market demand, engage potential customers and successfully bring innovative technologies to market.
