

Luigi Badaloni – CV

Transformation executive with over 30 years of experience in management consulting and digital transformation, specifically focusing on the pharmaceutical, consumer products, insurance, transportation, and utilities sectors. An expert in sustainable innovative technologies, he collaborates with various Italian universities on the conception, development, and launch of innovative startups in the fields of IoT sensors and blockchain. He possesses extensive international experience—primarily in Europe and the US—where he led global teams of over 100 professionals for approximately a decade, gaining direct experience in managing multinational accounts within the pharmaceutical and consumer products industries. Contract Professor at Luiss Business School, Professor in the Inventive Engineering Master's program at Sapienza University of Rome.
