Andrea Barisione received his B.Sc. and M.Sc. degrees in Energy Engineering from Politecnico di Milano, graduating in 2023. Since December 2023, he has been a Research Scientist at RSE (Ricerca sul Sistema Energetico), where he focuses on the testing, diagnostics, and modeling of energy storage systems, with particular emphasis on lithium-ion batteries. His research activities include battery characterization, degradation modeling, digital twins, and machine learning-based diagnostic methods.
