Giulia Bazzano is a researcher at ENEA Frascati Research Centre, in the Particle Accelerators Laboratory. She holds a degree in Physics from the University of Pavia and a Ph.D. in Industrial Engineering from Sapienza University of Rome. At ENEA, she contributed to the commissioning of the TOP-IMPLART proton linear accelerator. Her current work focuses on irradiation services for academic and industrial users in fields such as radiobiology, dosimetry, materials science, and space technology.
