Paolo Bondavalli

Paolo Bondavalli is a Programme Manager at EIC/EISMEA, where he supports breakthrough innovation with a focus on high-impact technologies and their path to market. He brings strong scientific expertise in advanced materials, particularly 2D materials such as graphene and topological insulators. He has also contributed to the European Graphene Flagship, linking frontier research with innovation and industrial applications. He is the single author on two books on 2D materials and their exotic properties.
