

Short CV Charles Cassidy

Charles Cassidy (2000) graduated in 2023 with a degree in Chemistry and Classics from the College of the Holy Cross, Massachusetts, USA. During his undergraduate studies, he completed a thesis in collaboration with the Harvard Art Museums, focusing on the removal of iron and manganese stains from simulated terracotta surfaces using different chelating agents.

He subsequently joined the Erasmus Mundus Joint Master's programme in Archaeological Materials Science (ARCHMAT), where he obtained his Master's degree. His final thesis focused on photocatalytic systems as anti-pollution protective surface treatments for historic and cultural heritage materials.
