L. Ceccarelli has a PhD in Archaeology at Cambridge University, UK, she is also a Research Fellow at the British School at Rome and author of peer-reviewed publications in archaeometry since 2018. Currently she is completing a second PhD in Materials Engineering at Politecnico di Milano, Department of Chemistry, Materials and Chemical Engineering. Her current research focuses on the multi-analytical characterization of archaeological metals and their corrosion processes, from museum collections and excavations in central Italy. She combines archaeological expertise with materials science to investigate production technologies in metals and ceramics.
