Short Bio

Giulia Elli obtained a bachelor's degree in biotechnology at the University of Milan in 2017, and a master's degree in biotechnology at Lund University (Sweden) in 2019. In 2024 she obtained the PhD title in Food Engineering and Biotechnology, from the Free University of Bolzano; the work was carried out together with the Smart Materials group in IIT, Genova. Now she is a technologist in the Sensing Technologies Lab, working in the Micro-Char LAB project (funded by the European Union FESR program). A laboratory for micro characterization is being set up in the NOI Techpark laboratories.
