

Biography

Prof. Viviana Frantellizzi, MD, PhD, is Associate Professor of Nuclear Medicine at Sapienza University of Rome. Her academic and clinical activities focus on molecular imaging, theranostics, personalized dosimetry, radiation protection, and precision medicine. She holds a PhD and completed the Second-Level Master's Degree in Security and Emergency Logistics (MLSE), developed by the University of Padua in collaboration with the Italian Ministry of Defence through the Joint Logistics Education Center (Ce.FLI) of the Centre for Higher Defence Studies (CASD). Her expertise includes radiological and nuclear preparedness, CBRN-related healthcare response, and the medical management of radiation emergencies. Prof. Frantellizzi is the author of numerous peer-reviewed scientific publications and actively contributes to research, education, and innovation in nuclear medicine and radiological protection.
