Giuseppe Mensitieri – CV

Giuseppe Mensitieri, is a full professor of Materials Science and Technology at the Department of Chemical, Materials and Production Engineering of the University of Naples Federico II. He formerly served as director of this department. His current research interests are in the field of structure-properties relationships in polymeric materials with focus on thermodynamics of glassy and rubbery polymers, as well as on thermodynamics and mass transport properties of mixtures of polymers and low molecular weight penetrants and their analysis by vibrational spectroscopy techniques.
He is author of more than 200 publications, on international peer reviewed journals, on topics related to polymer science and technology and has authored a monograph on *Foaming with supercritical fluids* (Elsevier 2021).
