

Massimo Merenda – CV

Massimo Merenda is an Associate Professor at the University Mediterranea of Reggio Calabria, where he focuses on embedded artificial intelligence, neuromorphic computing, and wireless sensing systems. His research investigates the integration of AI into constrained platforms such as microcontrollers, smart sensors, and memristive devices. He has authored numerous scientific publications in the fields of embedded systems and edge AI. Massimo Merenda is an active member of the IEEE community, represents the IEEE Council on RFID within the IEEE AI Coalition, and contributes to the organization of international conferences and special sessions on AI-enabled hardware.
