Sabrina MORELLI – CV

Sabrina Morelli (ORCID: 0000-0001-7551-8427) is Senior Researcher at the National Research Council of Italy–Institute on Membrane Technology “Enrico Drioli” (CNR-ITM). Her research focuses on membrane technology for biomedical applications, with particular expertise in the development of bioartificial membrane systems for tissue engineering, regenerative medicine, and 3D tissue models for disease modeling and drug screening. She is actively involved in national and international research projects, serves as a scientific evaluator of research projects, member of international scientific committees and journal editorial boards. She has authored more than 100 scientific publications, including journal articles, book chapters, encyclopedia entries, and conference proceedings.
