Prof. Teresa Musumeci, Ph.D., is an Associate Professor of Pharmaceutical Technology, Medicines Regulation, and Pharmacoeconomics at the Department of Drug and Health Sciences, University of Catania, Italy. She earned her Ph.D. in Technologies of Biologically Active Substances from the University of Palermo. Her research primarily focuses on the design, optimization, and characterization of nanomedicines and colloidal carriers (such as polymeric nanoparticles). In recent years, her pioneering work has investigated advanced nose-to-brain delivery strategies for targeting neurodegenerative conditions like Alzheimer's disease and epilepsy. Prof. Musumeci is the Principal Investigator of major research projects funded by University of Catania and the Italian Ministry of University and Research (MUR). She contributes actively to the international scientific community as an Associate Editor, Guest Editor, and Editorial Board Member for different journals, including *Frontiers* and *MDPI*. She has co-authored over 93 peer-reviewed papers with an h-index of 34.
