

Dr. Lorenzo M. Orsini is the R&D Director at Alkeemia, European leader for the product of Hydrogen Fluoride and relevant products. He achieved a PhD degree based on the development of Fluorinated materials for surface modification at University of Pisa. After an experience as assistant researcher at Virginia Commonwealth University, he spent 10 years in the flexible packaging industry developing new technologies and products. As R&D Director in Weylchem Italy, he had the opportunity to work in the field of fluorination organic chemistry for segments as Agrochemicals, Pharma, Performance Materials and Electronics as contract manufacturer. He's a Lean Six Sigma Green Belt and Design for Lean Six Sigma Black Belt. Today, he's supporting the development of HF downstream business through the implementation of new fluorinated product portfolio related to the energy storage sector and innovative fluorination technologies.
