Maria Laura Sforza received her M.Sc. degree in Physics from Sapienza University of Rome, Italy, in 2023. She is currently pursuing a Ph.D. in Morphogenesis and Tissue Engineering - Biophysics Curriculum at Sapienza University of Rome, Italy, under the supervision of Prof. Luciano De Sio. Her research interests include biomedical applications of physics, optics, and nanotechnology, with particular attention to nanofabrication and characterization of nanomaterials, plasmonic biosensors and nanodelivery systems. She is currently working on combining gold and lipid nanoparticles for the remote-controlled delivery of ssDNA for therapeutic and diagnostic purposes.
