

*Gian Carlo Tronzano holds a degree in Physics from the University of Turin and brings over 30 years of experience in the industrial automation sector.*

*He has been a key member of Comau for more than 20 years, and for the past six years, he has led the company's e-Mobility Global Competence Center. In this role, he oversees the development of advanced automation solutions, specifically focusing on the industrialization of battery cells, modules, and packs.*

*Mr. Tronzano represents Comau within the Batteries European Partnership Association (BEPA) . His work is centered on bringing next-generation technologies—such as sodium-ion and solid-state batteries—to industrial scale, as well as advancing circular economy initiatives including battery recycling and second-life applications.*
