A. Veroni: graduated in in Electrical Engineering from Polytechnic University of Milan in 2016. He is currently working with RSE - Ricerca sul Sistema Energetico, Milan, Italy, where he is with the Transmission and Distribution Technologies department. His research interests include MVDC (Medium Voltage Direct Current) distribution systems for multi-level and multi-terminal applications, power electronics converters modelling and control and real-time HIL (Hardware-In-the-Loop) simulations of power electronics control and protection.
