Doga Yuce is a senior Chemical Engineering student at Konya Technical University, focusing on nanophotonics, green nanotechnology, photovoltaics, and biosensing platforms. She has led award-winning research teams, achieving top rankings at TEKNOFEST (9th out of 14,610 teams) and project competitions. With practical experience in solar cell manufacturing and polymer composites, she is currently a voluntary intern at Fondazione Bruno Kessler (FBK) in the Sensors and Devices Center, working on gas sensors.
