

Abdullah Zeybek

Abdullah Zeybek is a graduate researcher and M.Sc. candidate in the Department of Chemical Engineering at Konya Technical University. He received his B.Sc. degree in Chemical Engineering from Konya Technical University. His main research interests include surface modification, nanotechnology, and chemical vapor deposition (CVD) processes. He has hands-on research and technical experience in iCVD and oCVD techniques for the fabrication of conductive polymer coatings on smart textiles and the development of superhydrophobic, breathable fabrics for advanced applications. In addition to his academic research and involvement in national projects (such as TUBITAK), he possesses substantial industrial experience in production operations, quality control, and laboratory management.
